**VESTAKEEP product range
2002/95/EC (RoHS)**

Dear Mr. Berry,

We can confirm that we do not use Heavy metals and bromine compounds such as regulated in the above mentioned directive to produce our VESTAKEEP product range. We use raw materials of technical purity. Based on this the occurrence of these substances can be excluded, except negligible amounts on the level of natural impurities.

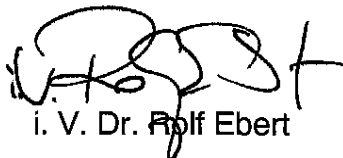

We hope this will be helpful for you. Please do not hesitate to contact Dr. Walter Kleinert, ext. 2307 if you need further information.

Yours sincerely,

 Degussa GmbH

ppa. Andreas Fischer
